Effective Hyperhidrosis (Excessive Sweating) Treatment at RootCosmo

Excessive sweating, or hyperhidrosis, can be more than just a nuisance; it can significantly impact your daily life and self-confidence. At RootCosmo, we offer advanced Aesthetic Cosmetology treatments and procedures to help you regain control over your sweating and live more comfortably.

Understanding Hyperhidrosis

Hyperhidrosis is a condition characterized by uncontrollable and excessive sweating, often exceeding the body's cooling needs. While sweating is a normal bodily function to regulate temperature, hyperhidrosis goes beyond what is necessary and can affect various parts of the body, including the underarms, palms, soles of the feet, and the face.

Hyperhidrosis Treatment by Dr. Neethu Nanda

Dr. Neethu Nanda, our skilled and experienced expert, specializes in providing effective hyperhidrosis treatment at RootCosmo. She understands the physical and emotional challenges that excessive sweating can bring, and she is dedicated to helping you find a solution that works for you.

Treatment Options for Hyperhidrosis

We offer a range of advanced Aesthetic Cosmetology treatments to address hyperhidrosis effectively:

1: Atrophic or Depressed Scars

- ✔ **Botulinum Toxin (Botox) Injections:** Botox injections are a popular and minimally invasive treatment for hyperhidrosis. By targeting the overactive

sweat glands, Botox can reduce sweating in the treated areas for several months.

- ✔ **Microneedling with PRP:** This procedure uses your platelet-rich plasma (PRP) to stimulate collagen and elastin production in the skin. It can help reduce excessive sweating while improving skin texture and tone.
- ✔ **Laser Sweat Ablation:** Laser sweat ablation is a safe and efficient procedure that targets and destroys sweat glands, providing a long-term solution for hyperhidrosis.
- ✔ **Iontophoresis:** This non-invasive procedure uses a low-level electric current to reduce sweating in the hands and feet. It can be performed at our clinic or prescribed for home use.
- ✔ **Oral Medications:** This procedure uses your platelet-rich plasma (PRP) to stimulate collagen and elastin production in the skin. It can help reduce excessive sweating while improving skin texture and tone.

Customized Treatment Plans

Dr. Neethu Nanda will work closely with you to determine the best treatment plan based on your specific needs and the areas affected by hyperhidrosis. We understand that each patient is unique, and we tailor our approach accordingly.

Regain Your Confidence

Excessive sweating doesn't have to control your life. Our expert team at RootCosmo is here to help you regain your confidence and live more comfortably. Say goodbye to the stress and discomfort of hyperhidrosis and hello to a new level of confidence and freedom.

If you're ready to explore effective hyperhidrosis treatment options, contact us today to schedule a consultation with Dr. Neethu Nanda and take the first step towards a drier, more comfortable future.
