Hair Transplantation at RootCosmo: Restoring Confidence, One Follicle at a Time

Hair loss can be a source of distress, impacting one's self-esteem and overall sense of well-being. At RootCosmo, we understand the emotional toll hair loss can take, and we're here to offer a solution. Dr. Neethu Nanda, our esteemed expert in Aesthetic Cosmetology, specializes in advanced Hair Transplantation procedures designed to help you regain a full head of hair and your lost confidence.

Understanding Hair Loss

Hair loss can be attributed to various factors, including genetics, hormonal imbalances, age, and lifestyle. For many, it's a natural part of the aging process. However, losing your hair doesn't mean you have to accept it. Dr. Neethu Nanda and our dedicated team are committed to providing effective Hair Transplantation in order to restore not just your hair but also your self-assurance.

Why Choose Hair Transplantation at RootCosmo?

Hair transplantation is a surgical procedure that involves moving hair follicles from one area of the body (the donor site) to an area experiencing hair loss (the recipient site). The result is a natural, fuller head of hair. Dr. Neethu Nanda is renowned for her expertise in Hair Transplantation and brings a wealth of experience to RootCosmo.

Our approach is simple: a personalized treatment plan that suits your specific needs and hair type. Dr. Neethu Nanda's precision and artistry ensure that the transplanted hair blends seamlessly with your existing hair, leaving you with a natural and enhanced appearance.

Hair Transplantation Techniques

At RootCosmo, we offer two primary hair transplantation techniques:

At RootCosmo, we offer two primary hair transplantation techniques.

- ✔ **Follicular Unit Transplantation (FUT):** In this method, a strip of hair-bearing skin is removed from the donor site and dissected into individual follicular units. These units are then transplanted to the recipient site. FUT is ideal for those who require maximum coverage.
- ✔ **Follicular Unit Extraction (FUE):** FUE involves the extraction of individual hair follicles directly from the donor site and their transplantation to the recipient area. This technique leaves minimal scarring and provides a natural look.

What to Expect

Before the procedure, Dr. Neethu Nanda will conduct a thorough evaluation and discuss your goals and expectations. We will guide you through the process, answering any questions you may have.
