

Barcode No **86317810**  
Patient Name **Mr.NARESH SINGH**  
Age/Sex **34 YRS/Male**  
Referred By **DR. RAINA LAB**

Lab No **16952405050041**  
Reg Date **05/May/2024 04:25PM**  
Sample Coll. Date **05/May/2024 04:25 PM**  
Sample Rec.Date **07/May/2024 08:05 AM**  
Report Date **07/May/2024 10:04AM**

**.IMMUNO BIOCHEMISTRY-1**

| Test Name With Methodology                                                         | Result | Unit  | Biological Ref.Interval |
|------------------------------------------------------------------------------------|--------|-------|-------------------------|
| Cortisol [Morning]<br><small>Serum, Electro Chemi Luminescent Immuno Assay</small> | 18.21  | µg/dL | 4.82 - 19.5             |

**COMMENTS:**

Cortisol is produced and secreted by the adrenal glands. Cortisol is a hormone that plays a role in the metabolism of proteins, lipids, and carbohydrates. It affects blood glucose levels, helps maintain blood pressure, and helps regulate the immune system. The level of cortisol in the blood (as well as the urine and saliva) normally rises and falls in a "diurnal variation" pattern. It peaks early in the morning, then declines throughout the day, reaching its lowest level about midnight. This pattern can change when a person works irregular shifts (such as the night shift) and sleeps at different times of the day, and it can become disrupted when a disease or condition either limits or stimulates cortisol production.

Dr Prashant Goyal  
(Chief Pathologist)
