

Barcode No	87139878	Lab No	16952409090003
Patient Name	Mrs. NADIRA	Reg Date	09/Sep/2024 02:43PM
Age/Sex	40 YRS/Female	Sample Coll. Date	09/Sep/2024 01:45 PM
Referred By	DR. Y P GUPTA	Sample Rec. Date	10/Sep/2024 07:45 AM
		Report Date	10/Sep/2024 09:20AM

.IMMUNO BIOCHEMISTRY-1

Test Name With Methodology	Result	Unit	Biological Ref.Interval
TPO(Antithyroperoxidase) (Anti Microsomal Antibodies)			
Anti Thyroid Peroxidase Antibody	20.0	IU/ml	<34.0

Serum, Electro Chemi Luminescent Immuno Assay

COMMENT:

Thyroid antibody testing is primarily ordered to help diagnose an autoimmune thyroid disease and to separate it from other forms of thyroiditis. It may be ordered to help investigate the cause of an enlarged thyroid gland (goiter) and/or performed as a follow-up when other thyroid test results (such as T3, T4, and/or TSH) show signs of thyroid dysfunction. Mild to moderately elevated levels of thyroid antibodies may be found in a variety of thyroid and autoimmune disorders, such as thyroid cancer, Type 1 diabetes, rheumatoid arthritis, pernicious anemia, and autoimmune collagen vascular diseases. Significantly increased concentrations most frequently indicate thyroid autoimmune diseases such as Hashimoto's thyroiditis and Graves' disease. Presence of these antibodies in the mother can increase the risk of hypothyroidism or hyperthyroidism in the fetus or newborn.

Dr Prashant Goyal
(Chief Pathologist)
