Statistical evaluation of **Dual Marker** has been done using **Benetech PRA** software.

The test is valid between 10 Weeks to 13 weeks & 6 days of gestation.

**Dual or Double marker** test in first trimester, identifies pregnancies that have a high risk of babies having the following chromosomal abnormalities:

1. Trisomy 21 (Down syndrome)
2. Combined Trisomy 13 (Patau syndrome)/ Trisomy 18 (Edwards syndrome)

**This Screening test is NOT a diagnostic test** (it cannot tell whether the baby has any of the above conditions); it only identifies the risk of the baby being affected. A confirmatory test may be needed when the screening test is positive (high risk)

The interpretive unit is MoM (Multiples of Median) which takes into account variables such as gestational age (ultrasound), maternal weight, race, insulin dependent Diabetes, multiple gestation, IVF (Date of Birth of Donor, if applicable), smoking & previous history of Down syndrome. Accurate availability of this data for Risk Calculation is critical.

## DUAL MARKER

**Patient Name:** Mrs. NAVJOT KAUR  
**Race:** INDIAN  
**Physician:**

**Code:** 87943865  
**DOB:** 08/06/93  
**Reported:** 02/02/25

### CLINICAL INFORMATION

**Estimation Method:** by U/S on 01/02/25  
**Age at Term:** 32.2 years  
**EDD:** 11/08/25  
**Gestation:** Singleton  
**Maternal History:** IDDM(U), SMOKER(U), IVF(U)  
**Gestational Age:** 12 weeks 5 days  
**Referring Lab #:** 87943865  
**Specimen Code:** 87943865  
**Specimen Date:** 01/02/25  
**Received Date:** 02/02/25  
**Weight:** 45.0 kg  
**Screening Status:** Initial sample  
**Para / Gravida:** 0 / 0

### REMARKS

#### Down Syndrome

The risk of Down syndrome is LESS than the screening cut-off.

#### Trisomy 18/13

The risk of trisomy 18 is less than the screening cut-off.

### ULTRASOUND

**Sonographer:** 000

**Ultrasound Date:** 01/02/25

**CRL:** 64.3 mm **NB:** Present  
**NT:** 1.4 mm **0.85 MoM**  $-0.25 \Delta$

### BIOCHEMISTRY

| MARKER   | RESULT          | MoM  |
|----------|-----------------|------|
| PAPP-A   | 1022.10 ng/ml   | 0.41 |
| hCG (T1) | 159624.0 mIU/ml | 1.43 |

### INTERPRETATION

**Down Syndrome:** Screen Negative

**Trisomy 18/13:** Screen Negative

### CLINICAL RESULTS (at term)

The calculated risk by Benetech depends on the accuracy of the information Provided by the referring physician. Please note that calculation are statistical approaches and have no diagnostic value.
